Priority Projects: FLOOD CONTROLLING

The Infrastructures and Facilities:

Mass Transportation

Jakarta Provincial Government is designing a Macro Transportation Pattern (MTP) of Jakarta area, consists of Bus-way, Monorail, Subway and Waterways.

WASTE MANAGEMENT

Using high technology and involving private investors, known as Integrated Waste Management Site.

To provide housing for the low income society, low cost apartments have been built for many units,

CONSTRUCTION OF LOW COST APARTMENT

sold in relatively cheap and affordable prices.

ENVIRONMENTAL PRESERVATION

Senayan Park

Kemayoran Street

Jakarta keeps promoting greening programs with a theme: "Jakarta Ijo royo-royo dan berkicau" (The Green Jakarta with chirping birds).

PROBLEMS ENCOUNTERED

Organization principle: "slim structure, rich in functions"

officials have yet comply with the standard of competence and other requirements needed.

- Physically, the development growth of Jakarta covers the neighboring areas, which also have autonomy such as Bogor, Depok, Tangerang and Bekasi.

- Yet, no cooperation pattern and strong legal bases for the cooperation with the neighboring authorities.
